

# Interactive UFO DRONE

Introducing the Interactive UFO Drone! Fitted with 4 high-tech sensors, the drone will sense objects/people around it within a range of 10cm and react accordingly, which means there is no need for a complicated remote control! The Interactive UFO Drone can be controlled using just your hands, flying in all different directions. The 4 plastic propellers are concealed within a flexible outer shell, meaning the drone can take bumps and falls without taking any damage. Sporting a generous spot colour branding area, the Interactive UFO Drone is the perfect gift for all ages!

\*Please note: These product images are used for illustration purposes only and the colours of the final product may vary slightly.
